

If Manny Pacquiao hits his 65kilogram opponent with 1950 Newtons of force in the forward direction while 1625 Newtons of frictional force is exerted on the opponent, what is the magnitude of his opponent's acceleration?

If my P.T. Cruiser exerts 25,000 Newtons of force in the forward direction on an unfortunate grasshopper, what is the force exerted by the grasshopper on my P.T. Cruiser?
